

In the Name of God

Ensuring people's health is the ultimate goal of the Ministry of Health, Treatment and Medical Education. In order to realize this great goal, this ministry has many deputies in its body, without a doubt, each of them is working around the clock in some way to ensure people's health. One of these vice-chairs is the deputy for education, which plays an important role in the education of health science students through its efforts in helping people achieve health.

Dear nursing, midwifery, operating room and medical emergency students, by leaving their studies in college and entering the clinic and playing professional roles, they have a great and undeniable contribution in ensuring people's health at all levels of disease prevention, and therefore I wish each and every one of them, Keeping this important point in their mind, that they shouldn't neglect the great responsibility they have assumed and always they should use all possible opportunities in learning scientific material, improving knowledge and using specialized skills, cultivating and developing thinking, strengthening memory, getting familiar with the principles of research and developing creative thinking and learn the principles of development and development of technological projects.

Our dear students should remember that the key to success in any organization, especially in an educational organization, is active and continuous presence in all areas of learning and active participation in educational programs, and it is better that they, in addition to acquiring knowledge and skills, overcome deficiencies and Don't ignore errors and try to fix these deficiencies by contacting us.

Our honorable professors are undoubtedly aware of their serious responsibility in educating knowledgeable, skilled, creative, passionate, honest students and I wish them success in this serious responsibility.

Our logistic personnel , including respected employees and dear service staff, help by facilitating the work and not delaying the honorable professors and dear students in administrative and welfare matters to prevent them from wasting their time and provide more opportunities for teaching and learning of students. Therefore, they also indirectly play a role in providing people's health.

I ask the Almighty God for the success of all the dignitaries in achieving our great and ultimate goal, which is to ensure the health of the people.

Dr. Mohammad Hasan Sahebihagh
Professor of Nursing Education
(Community Health Nursing)
