

Classrooms & Conference Halls

We believe that 21st century classroom is a productive environment in which students can develop the skills they will require in the workplace and teachers are facilitators of their learning. In our skill labs we try our students to experience the hospital environment they will enter after graduation and making them adept with using technology and all other skills that they will need in the future.

In school we know that the educational practices and teachers must develop new teaching strategies that are radically different from those employed in the traditional classrooms. Our modern day classrooms are equipped with projection facilities and a high standard of relevant facilities and try to be more centered on students.
