

# Solmaz Ghanbari Homaie

**Birth Date:** March 21, 1991

**Current Position:** Assistant Professor; Dean of Education & Research Deputy of Taleghani Hospital; Head of Clinical Research Development Unit

**Address:** Taleghani Hospital, Rah-Ahan Street, Tabriz, East Azerbaijan, Iran.

**Tel (office):** (98) 413 4424420; (98) 914-1096800

**E-mail:** homayisolmaz@gmail.com

---

## Qualifications

2019 PhD of Midwifery, Tabriz University of Medical Sciences

2015 Masters of Midwifery, Tabriz University of Medical Sciences

2013 Bachelor of Midwifery, Tabriz University of Medical Sciences

## Awards

2020 National Outstanding Researcher

2019 Professor Shahriyari Award

2019 The First Ph.D. Midwifery Graduate in Iran

2017 Received Two Grants from the National Elite Foundation

2015 Best Postgraduate Student Award, Tabriz

2013 Best Undergraduate Student Award, Tabriz

## Projects

1. The status of uterine cancer screening and its effective factors among Tabriz women
2. Relationship between preeclampsia syndrome and seasonal changes
3. Comparison of religious orientation and its relationship with marital adjustment in infertile and fertile women
4. Sleep status and its relationship with depression up to one year after delivery in women referring to Tabriz health centers
5. The impact of pharmacological and non- pharmacological interventions on the negative childbirth experience: A systematic review and meta-analysis study

6. The Relationship between birth experience and maternal performance and postpartum mental health
7. Comparison of thinking styles and its relationship with marital adjustment in infertile and fertile women
8. Social determinants of a healthy lifestyle in Iranian women: A systematic review and meta-analysis
9. Comparison of domestic violence in infertile and fertile women and help seeking behaviors
10. Effect of Curcumin on metabolic indicators in women with polycystic ovary syndrome: a randomized controlled clinical trial
11. Psychometrics properties of pregnancy anxiety questionnaires and signs of pregnancy and their relationship with maternal-fetal attachment
12. Effects of prebiotics on menopausal symptoms and metabolic indicators in postmenopausal women: A randomized controlled clinical trial
13. The effects of lemon balm (*melissa officinalis* L.) alone and in combination with nepeta menthoides on the premenstrual syndrome (PMS) and menstrual bleeding in students with premenstrual syndrome: a randomized controlled trial (**MSc Dissertation**)
14. Developing of a new guideline for improving birth experiences among Iranian women: a mixed method study protocol (**PhD Thesis**)
15. Comparison of birth experience in different Iranian ethnic groups
16. The revision of Midwifery PhD curriculum in Iran
17. Design, implementation and evaluation of the educational software of principles of healthy eating based on Gamification in nursing students of Tabriz University of Medical Sciences
18. The relationship between adherence with the World Health Organization guideline for creating positive birth experience with fear of childbirth and birth experience: a cross-sectional study
19. Designing a guideline to improve birth experiences as a mobile application and evaluating its effectiveness on knowledge of midwifery students
20. Comparison of maternal and neonatal outcomes after vaginal delivery by birth attendant: a cohort study
21. Determine of prevalence of postpartum psychological outcomes and it's predictors among adolescent mothers: A systematic review and meta-analysis

22. The relationship between birth experience with childbearing, short and long maternal outcomes: a cohort study
23. Comparison of the effect of companion with natural childbirth experience compared to cesarean delivery experience on fear of childbirth and childbirth experience: a randomized controlled clinical trial study
24. Investigating the causes of stunting in children under five years of age due to birth abnormalities with ecological-social pattern in East Azarbaijan province
25. Pregnant women's preferences and awareness regarding childbirth pain relief methods and its relationship with some maternal outcomes: a longitudinal study
26. Epidural analgesia and psychological disorders (PPD, PTSD, anxiety): a systematic review and meta-analysis
27. Designing an electronic registration system for the summary of women's medical records in different periods of life for the clients of Taleghani Hospital in Tabriz

### **Thesis**

1. Association of pregnancy experience with some maternal and neonatal outcomes: a longitudinal study (Supervisor)
2. Birth experience, post-traumatic stress syndrome following childbirth and their relationship with maternal functional among adolescent mothers: a cross-sectional study (Supervisor)
3. Comparison of birth experience and fear of childbirth among mothers with pre-term and full-term labour: a cross-sectional study (Supervisor)
4. Pregnancy symptoms and its relationship with nutritional status, physical activity and social support among pregnant women: a cross-sectional study (Supervisor)
5. The effect of 78% dark chocolate on depression among postmenopausal women: a randomized controlled clinical trial (Supervisor)
6. The effect of evening primrose oil on clinical symptoms of women with polycystic ovary syndrome: a randomized controlled clinical trial (Advisor)
7. Effect of vitamin D on healing rate of anogenital warts and quality of life associated with human papillomavirus (HPV): a randomized controlled clinical trial (Second Supervisor)

8. The effect of basil capsules on postpartum depression symptoms: a randomized controlled trial (Supervisor)
9. Determining the association of remifentanyl analgesia with postpartum depression and childbirth experience: a cohort study (Second Supervisor)
10. The effect of topical ointment of propolis on severity of episiotomy pain and wound healing: a randomized controlled trial (Second Supervisor)
11. Implementation and evaluation of the Centering Pregnancy group prenatal care model in pregnant women with diabetes: A convergent parallel mixed methods study (Advisor)
